

Requirements Analysis & Business Critical Support

Oil Analysis

VT Group is a leader in oil analysis for the U.S. Army at home and abroad, with at least two certified evaluators at more than a dozen labs where VT has a presence. Our team is tireless in its efforts to ensure the safety of its partners, and provides detailed analyses of oil being used in daily operations under extreme conditions. Whether it is in training or in theater, we provide oil analyses that identify required preventative maintenance and potential mechanical failures before they occur.

VT operates and maintains seven U.S. Army oil analysis laboratories in the U.S., Iraq, Afghanistan, Kuwait and Puerto Rico. Our certified evaluators analyze approximately 325,000 samples per year.

We:

- Calibrate all analytical laboratory equipment,
- Conduct Joint Oil Analysis Spectrometric Correlation Program,
- Evaluate abnormal oil analyses,
- Test aeronautical equipment oil sample testing within 24 hours of receipt,
- Operate Oil Analysis Standard Inter-Service System (OASIS),
- Perform operator and preventative maintenance on all equipment,
- Establish and maintain current oil analysis technical library,
- Provide fully compliant hazard material management and
- Maintain laboratory certifications.

Requirements Analysis

Managing the readiness of tens of thousands of vehicles, we know what it takes to maintain optimal operation. We distill this knowledge into end-to-end requirements analysis services, partnering with our customers to enable them to select, specify, support and manage their equipment platforms and assets.

We analyze mission requirements and gather data, examining and comparing alternatives. We establish metrics by which an assessment can be made, and help determine which alternative best meets the needs of the requirement. The end result is a detailed report allowing our customers to see the time, budget and materials needed to equip assets for new circumstances.

By aligning our services with our customers' core activities, we have a direct impact on performance.

Business-Critical Support

The services we provide are directly related to our customers' core activities and have a direct impact on performance. This means that:

- We must maintain close working relationships with our customers.
- We must thoroughly understand our customers' business.
- High levels of trust must exist between the customer and VT.

Through this trust, however pivotal the activity, our customers can benefit from VT Group's expertise in service delivery.

Examples:

- VT provides essential services to NASA in support of a variety of orbital and sub-orbital at its Wallops Island Flight Facility, Va.
- We install complex electronics systems in HUMVEEs deploying to combat theaters.
- VT delivers radio programs internationally for the British Broadcasting Company (BBC). We are responsible for delivering this content to 183 million people worldwide.
- We maintain the 3,600-strong vehicle fleet for London's Metropolitan Police.
