

C4ISR Services

More than 30 years C4ISR Alteration Installation Team (AIT) Experience

VT Group has earned a superior reputation for delivering technical and engineering services for fleet- and shore-based communications, navigation and electronic warfare systems. We excel at delivery and support of customized solutions that satisfy the most demanding mission requirements:

- Fleet-based C4ISR Services: We are the largest fleet C4ISR Alteration Installation Team contractor for U.S. Navy surface ships and submarines. We are recognized world leaders in confined space AIT design, installation, testing and training
- Shore-based C4IT Systems: We supply communication and operations centers for the U.S. Department of Defense Communications and battle support systems for tactical military vehicles

Integrated Solutions Expertise

Our personnel—many of whom are former military and carry secret clearances or higher—are certified and experienced in systems that span the C4ISR environment. This seasoned workforce allows VT Group to undertake project and program management involving full design, build,

installation, operation, maintenance and through-life support of projects. On ship, on shore, at U.S. bases and around the world, VT Group teams offer:

- End-to-end program management
- Systems integration
- Engineering, Engineering Evaluation, Technical Acceptance and Training
- System and Equipment Fabrication
- Installation Planning
- Installation and Testing
- Technical Support Services
- Radio Frequency Infrastructure and Point Communications Solutions
- Power Generation and Distribution

As Your Partner

We pride ourselves on our close relationships with customers and our ability to continuously improve the quality, cost and ingenuity of our performance, striving to increase value to our customers.

VT Group C4IT teams throughout the world are flexible and rapidly responsive to our customers' needs. Our field personnel have experience working in harsh environments and know what our customers need to get the job done.

C4ISR Systems

VT Group is a nationally recognized leader in fleet C4ISR services. Under the largest U.S. Navy C4ISR AIT contract, we provide worldwide system life cycle support services for shipboard and land-based C4ISR systems and equipment.

- Premier implementer and installer of large deck C4IT LANs and have installed ISNS, IT-21 and other shipboard LANs on virtually every U.S. Navy ship
- Extensive research, design, hardware/software integration and software implementation support for various military commands around the world
- Lead installation contractor for C4ISR submarine ship alterations; with Combined Alteration Package installation and Common Submarine Radio Room (CSRR) experience
- Installation contractor for Unmanned Aerial Vehicles (UAV) navigation control centers
- From a strong foundation in submarine work, VT Milcom excels at installation of high-technology gear in confined spaces. We provide installation and testing of equipment in tactical vehicles headed for battle theaters, such as Humvee and Mine Resistant Ambush Protected (MRAP) vehicles.

“Doyle could not be more pleased with the service provided by the [VT] AIT Installation Team who performed with the utmost professionalism and met all requirements on or ahead of schedule. Their willingness to provide assistance and workarounds ensured Doyle remained 100 percent operational throughout the entire install. The [VT Group] Team is to be commended for an excellent product and is welcome onboard Doyle anytime for future installations.”

— Commanding Officer,
USS Doyle (DDG 75)
