

The American Institute of Architects (AIA) Continuing Education Course

Design the Solution

Fundamentals and Applications of Passive Optical LAN

VT Group, an American Institute of Architects Continuing Education System (AIA CES) Provider, is offering a general Learning Unit (LU) course to demonstrate how your clients can save money and future-proof their networks while lowering OPEX and CAPEX investments.

This AIA approved course describes the fundamental components and benefits of employing a Passive Optical LAN infrastructure to deliver voice, data and video to workplace environments, while helping achieve LEED certification.

As a course participant, you will:

- become familiar with the scope of Passive Optical LAN technology, including
 - *System components.*
 - *Performance.*
 - *Costs and associated benefits.*
- learn when Optical LAN is appropriate for your clients.
- identify which technologies are supported by Passive Optical LAN.
- discover how to diversify your solution offerings with Optical LAN.
