

## UNMANNED BUSINESS

### ABOUT VT GROUP

Headquartered in Chantilly, VA, VT Group is a leading technology integrator with close to 50 years' experience delivering technology and C4ISR solutions to complex challenges faced by our government and commercial customers in the Defense and National Security markets. As an end-to-end provider of integrated IT engineering and installation services, VT Group's portfolio of core competencies includes: C4ISR and C2 facility integration, Passive Optical LAN (POL); Cyber Security; wireless (Wi-Fi) and distributed antenna systems (DAS); data center design/build and migration; audio/visual and digital media; and electronic security and surveillance systems. VT Group operations span more than 80 locations and 660 employees throughout the world.

VT Group's cleared and highly skilled personnel consistently deliver innovative, agile, and turnkey solutions to solve our customers' toughest challenges.

VT Group provides Unmanned Aircraft Systems (UAS) management and operations at remote sites in harsh environments around the world, including forward-operating bases in Afghanistan, Iraq, Africa, Saudi Arabia and aboard U.S. Navy ships and research vessels in the Arctic Ocean. All VT Group Unmanned Aerial Vehicle (UAV) operators have military experience and are skilled in the technical operation, imagery analysis, payload operations and maintenance of our unmanned systems—delivering UAV support services at a completion rate that is safe and 100% on time.

We constantly pursue the best-in-breed technologies among UAS platforms, payloads, data-links, systems engineering and logistics solutions. We provide adjunct testing services to defense, civil and commercial customers, supporting unmanned systems-based development and operational verification on both VT Group-owned unmanned assets and client-furnished platforms.

### OUR QUALIFICATIONS
